INTERNATIONAL SEARCH REPORT

10/534696
International application No.

PCT/JP03/14612

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

This international application includes four inventions, which does not satisfy the requirement of unity of invention set forth in PCT Rule 13.1-13.4.

Main invention: "Claims 1, 2, 5, 8, 9, and 12," where the invention relates to control of a radiator fan.

Second invention: "Claims 3 and 10," where the invention relates to oil temperature estimation based on motor rotation speed.
(continued to extra sheet)

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.

2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☒ The additional search fees were accompanied by the applicant's protest.
☐ No protest accompanied the payment of additional search fees.

Continuation of Box No. II of continuation of first sheet (1)

Third invention: "Claims 4 and 11," where the invention relates to oil temperature estimation based on pressure.

Fourth invention: "Claims 6, 7, 13, and 14," where the invention relates to the increase in heat generation of a motor by current phase control.

The inventions from the main to the fourth have a technical feature common to part or the whole of the construction of Claim 1; however, the technical feature is only prior art on the filing date of the international application or on the priority date. As a consequence, the technical feature is not a "special technical feature" within the meaning of PCT Rule 13.2, second sentence.
